

Nama of Class: Public Sector Management Strategy

Faculty: Faculty of Economics and Business

Department: Magister of Accounting

Coordinator: Indra Bastian, Prof, PhD, MBA, CA, CMA, Mediator

Year : 2021

A. Background

The idea for this lecture grew from a reality that a hardware and software technology is quite importance for a public sector management strategy technology. This means a distinctive of technology, activity and public externalities rule can not be examined. It should be an integration among those elements.

In this class, a technology research will be delivered as a part of duty. A lot of works in task and presentation will be a main feature of class quality. A skill of communication and awareness of the existing phenomena in a reality will be a main focus for a learning process.

B. Learning Goals and Objectives

The expectation of this class is that students able to :

1. synthesizing many features on a development of a public sector
2. develop a sharp and depth critical analysis on a public sector management strategy
3. communicate a clear case report

C. **RULE OF THE CLASS**

To ensure the quality of class, the rule of class should be raised, as:

1. Students should read and prepare the class material
2. Students come on time at class.

D. **EVALUATION**

The evaluation of this class will be based on the educational process insight of the daily class activities. The evaluated activities are:

1. Theoretical and Illustration Presentation (30%)
2. Local Welfare Design Film (30%)
3. Welfare Review Film (30%)
4. Mid and Final Exam (10%)

The Final Grade is an accumulation of whole four activities, with an arrangement as:

A	=	85% - 100%
B	=	75% - 84%
C	=	65 % - 74%
D	=	50% - 64%
E	=	<50
