#### COURSE DESCRIPTION

The purpose of this course is for students to understand the concepts of internal audit and its contextual (application) into internal audit research and practice. Internal auditing is a branch of science and technology auditing. Currently, internal audit has expanded its activities, including, but not limited to: financial auditing, compliance auditing, management (operational) audits, risk audits, quality audits, environmental audits.

The IIA defines internal audit as follows: Internal audit is an objective independent consulting and assurance activity designed to add value and improve an organization's operations. It helps an organization achieve its objectives by bringing a systematic and disciplined approach to evaluating and improving the effectiveness of risk management, control, and governance processes).

COURSE (LEARNING) METHOD

> For achieve course goals (CG) and course objectives (CO)\_ learning above, we used SCL (student center learning) course method SCL (student center learning) i.e combination of independent learning and class meetings. For reach purpose ability communication skills, work in team, and ability think critical (CG1, CG2, and CG4), students grouped to in teams for write dan discuss compile summary of course material (SCM, or ringkasan materi kuliah, RMK) and Research Article Criticism Report (RACR, atau laporan kritik artikel riset, LKAR). individually write and discuss in class meeting. Amount student in one group and amount group in class this depends on total student in this class. Possibility student grouped into several groups, with members of each group between 3 to 4 people. Each time a lecture will be appointed one group as the presenter, one group as the main discussion, and the other group as the general discussion. The discussion value is determined for each student individually, while the SCM value and RACR value determined by group. For discuss understanding and thinking about ethics profession (CG4) then every topic could connected with problems possible etiquette arise. For upgrade ability critical think and ability analyze and evaluate internal auditing information (CG5) in this class held mid semester exam (MSE, or ujian tengah semester, UTS), and end of semester exam (ESE, or ujian akhir semester, UAS).

> With method learning here , students expected could do two method internal auditing research that can grouped becomes two namely: (1) prescriptive, (2) descriptive. **Prescriptive research** more emphasize how a internal auditing by should normative formulated . This research was carried out with study internal auditing cases in organization so that could made decision how by normative internal auditing formulated. stages making this decision usually includes: (1) studying the background problem, (2) identify problem, (3) identify of alternatives for solution problem, (4) consider information finance (benefits and costs) as well as non-financial each alternative, (5) creation decision solution problem. Descriptive research emphasize on use inductivedeductive method for answer problems in internal auditing organization . These stages of research are usually includes: (1) background problems, (2) theory development, (3) problem formulation, (4) previous research results, (5) development hypotheses, (6) research methods, (7) analysis and evaluation, and (8) conclusions, recommendations, and research limitations (weaknesses). For push descriptive research skills, after mid exams will also be discussed research articles in the field of internal auditing and students required for compile Research Article Criticism Report (RACR or LKAR) and discuss it in class (research article discussion, RAD). In addition, on end of semester students also required compile internal auditing research proposal. Proposal could also arranged based on Case Research. Case research guidelines can be studied on Thesis Guidelines Book published by the FEB UGM Maksi Program . Research proposals score are individually.
